

In an active shooter situation, you are going to be a first responder. But, with 3 quick actions, you can save a life. The number 1 cause of preventable death after injury is bleeding. In this training you will gain the ability to recognize life-threatening bleeding and act quickly and effectively to control bleeding once you learn three quick techniques.

If you are a certificated employee, you can also become a STOP THE BLEED trainer. By teaching other staff members how to STOP THE BLEED, you are empowering your colleagues to save lives, perhaps including your own.

- *Criteria is established by the American Association of Surgeons*
